Office Action Summary	Application No. 10/569,830	Applicant(s) KELLER, WILHELM A.	
	Examiner LIEN TM NGO	Art Unit 3754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Terms lack antecedent basis, for example:

in claim 1, “the external surfaces”, “the outlet”, “the wall internal”;

in claim 2, “the inside of the locking ring”;

in claim 5, “the plug”;

in claim 8, “the flange ridge”;

in claim 9, “the traction and tighten slopes”;

in claim 12, “the opening”;

in claim 13, “the pulling action”.

Terms are indefinite, for example, “as seen” in claims 7, 9 and 13.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3754

4. Claims 1, 3-5 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Keller (5,423,443). Keller discloses, in figs. 1 and 8, a dispensing device comprising a stopper 1 having a tighten flange and a removable traction disk 15; and a locking ring 33 with bayonet connecting means; wherein the dispensing device is a double cartridge and the stopper comprises two plugs.

5. Claims 12 and 13 rejected under 35 U.S.C. 102(b) as being anticipated by Keller et al. (5,918,772). Keller et al. disclose, in figs. 18, 24 and 25, a dispensing device comprising a stopper 71 and a locking ring 51; wherein the stopper comprises a traction flange 73, 74 whose longitudinal extension is greater than the diameter of an opening of the locking ring.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2 rejected under 35 U.S.C. 103(a) as being unpatentable over Keller in view of Stanford et al. (5,456,830).

Stanford et al. disclose, in figs. 3 and 4, bayonet connecting means comprising a mutually cooperating means having traction slopes and a tighten slopes as claimed.

Art Unit: 3754

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the bayonet connecting means of the Keller dispensing device with bayonet connecting means comprising a mutually cooperating means having traction slopes and a tighten slopes, as claimed, as taught by Stanford et al., in order to provide a quick locked connection and unlocked disconnection between the locking ring and the outlet of the dispensing device.
